Institute of Physics of the Polish Academy of Sciences

Job Description

Job Title: Research assistant and extracurricular PhD student

Job Summary:

The winning candidate will work as a ³/₄ full time research assistant at the <u>International</u> <u>Centre for Interfacing Magnetism and Superconductivity with Topological Matter -</u> <u>MagTop</u> of the Institute of Physics of the Polish Academy of Sciences and prepare a doctoral thesis in the extramural mode, attending lectures at the <u>Warsaw-4-PhD</u> <u>Doctoral School</u>. The job is related to the development of infrared detector nanostructures from IV-VI and II-VI materials: fabrication by molecular beam epitaxy (MBE) technique supported by artificial intelligence (AI) and their optical studies (experiment).

Job Description:

Background: In today's world, there is a huge demand for sensitive and fast detectors operating in the mid- and long-wave region of the infrared spectrum, with applications covering all areas of life, from industry to environmental protection to medicine. <u>A new class of very promising detectors of this type, proposed by MagTop</u>, is based on combining the advantages of two types of semiconductor compounds: II-VI and IV-VI, from which it is possible, using the molecular beam epitaxy (MBE) technique, to produce alternate layers, each several atomic layers thick, the so-called superlattices (SL). Moreover, detectors of this type can potentially be cooled, in order to increase their sensitivity, by thermoelectric coolers made of the same compounds, integrated with them into a monolithic device.

Aim: The aim of the project is to design, fabricate and investigate detector nanostructures based on II-VI/IV-VI superlattices. For this purpose, <u>VEECO's world-class, multi-chamber MBE system</u> will be used. Optimization of structure design and growth parameters, in addition to the use of various characterization techniques (XRD, SEM, AFM), will be supported by the use of a software, based on AI. This software will be created and developed at MagTop with the participation of the PhD student, in parallel with the development of the detector fabrication technology. The main research technique will be optical studies, involving the measurement of spectral sensitivity.

Requirements:

- A Master's degree in Physics or in related fields, such as e.g. materials engineering and electronics, is required (or an equivalent that qualifies one for PhD studies in physics in the country of issue),

- Prior experience of working with ultra-high vacuum technology apparatus (especially MBE) and in optical studies of materials is highly desirable but not required,

Dofinansowane przez Unię Europejską

- Very good knowledge of English is required

Main research field: Physics

Sub Research Field: Solid state physics, Nanotechnology

Career Stage: Early stage researcher or 0-4 yrs. (Post-graduate)

Research Profile (details): First Stage Researcher (R1)

Type of Contract: Initial employment for a fixed term of 24 months, including a 3-month probationary period. Prolongation of employment for a further 24 months will be based on performance and successful completion of a mid-term evaluation performed at a level analogous to that in the PhD school.

Status: Part -time employee hired at ³/₄ of full-time contract

Salary: The person will be employed as a research assistant in a ³/₄ full time position for a period of maximum 4 years (with all employee benefits and an additional medical insurance package) with a gross salary of PLN 7 275 per month, which is approximately PLN 5 500 net/month. The MagTop project (FENG.02.01-IP.05-0028/23) is implemented as part of the MAB FENG action of the Foundation for Polish Science co-financed by the European Union from the 2nd Priority funds of the Programme European Funds for Smart Economy 2021-2027 (FENG).

Contact

More information can be obtained from

prof. dr hab. Tomasz Wojtowicz (e-mail: <u>wojto@MagTop.ifpan.edu.pl</u>); dr Michał Szot (e-mail: <u>szot@MagTop.ifpan.edu.pl</u>)

Please make contact.

Application details

Application deadline: 10.07.2024. Later applications may be considered.

Required materials:

- Scientific CV
- Cover letter
- Scan of MSc diploma or equivalent (or an explanation of when one is expected)
- Academic record (for finalized semesters)
- Recommended: A recommendation letter by an academic, or their contact email.
- A statement by the candidate of consent to the processing of personal data for the purposes of recruitment (as below).

All required materials for the position must be sent in electronic form to <u>open_positions@MagTop.ifpan.edu.pl</u> and <u>rekrutacja@ifpan.edu.pl</u> with the Job ID# as a subject.

DATA PROCESSING UNDER CONSENT FOR THE PURPOSES OF RECRUITMENT

Under Art. 13 sections 1 and 2 of the Regulation of the European Parliament and of the Council (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Resolution), EU OJ L 119 of 04.05.2016, page 1, as amended, hereinafter referred to as "GDPR", we hereby inform as follows:

- 1. The Data Controller of the provided personal data is the Institute of Physics of the Polish Academy of Sciences, Al. Lotników 32/46, 02-668 Warsaw, phone (22) 116-2111, e-mail <u>director@ifpan.edu.pl</u>.
- 2. Contact details to the Data Protection Officer are as follows: e-mail <u>iodo@ifpan.edu.pl</u>
- 3. Your personal data shall be processed for the purpose of carrying out the recruitment process for the position of Research assistant
- 4. Processing of your personal data in scope of: full name, date of birth, correspondence address, information about education and course of past employment shall take place under Art. 22¹ § 1 of the Act of 26 June 1974 Labour Code. In the scope in which you sent to us more personal data than indicated above, we process your data under the consent granted by you.
- 5. Your personal data shall be stored for 1 month from completion of the recruitment process. If you grant consent for processing of personal data for future recruitments, we shall process your data until withdrawal of the consent by you, however, no longer than for the period of 6 months from the day of submittal of the application by you.
- 6. Provision of the abovementioned data in the scope indicated above is a statutory requirement resulting from Art. 22¹ § 1 of the Act of 26 June 1974 Labour Code, in the remaining scope it is voluntary. Failure to provide the data referred to in Art. 22¹ § 1 of the Act of 26 June 1974 Labour Code precludes consideration of your candidacy for the offered position.
- 7. You have the right to access your personal data, to rectify them, erase them, restrict their processing.
- 8. You may submit a complaint to the Inspector General for the Protection of Personal Data.
- 9. You have the right to withdraw the consent to process your personal data in the scope in which they were provided at any time. Withdrawing the consent does not affect the lawfulness of processing carried out on the basis of consent before its withdrawal.
